

# SEALING STRIP AND A COMPONENT COMPRISING A FIRST AND A SECOND PART AND A SEALING STRIP

## Abstract

Sealing strip made of a substantially incompressible material for sealing between a first and a second component part which have been joined together. The sealing strip is intended to be inserted into a groove present on the first component part, where the sealing strip exhibits a substantially constant width along the main portion of its length and at least one protrusion on the sealing strip. The sealing strip in this portion is intended to be pinched into the groove.
